

Harvest Veterinary Oncology Centre (HVOC)

Harvest Veterinary Specialty & Emergency Hospital (HVSEH)

Want!

- 1. Veterinarian Specialist in Neurology**
- 2. Veterinarian Specialist in Internal Medicine**
- 3. Veterinary Registrar in Anaesthesia and Analgesia**
- 4. Full-time Veterinarian (Day & Night Shift)**
- 5. Veterinarian Specialist in Cardiology (Locum)**

Our hospital is seeking Board-Certified Veterinarian Specialists in Neurology, Internal Medicine, a Veterinary Registrar in Anaesthesia and Analgesia, a full-time veterinarian, and as well as a Veterinarian Specialist in Cardiology (Locum) to join our dynamic and collaborative team! We are an integrated animal hospital designed to meet the diverse demands of animal healthcare by offering a full spectrum of clinical services to our patients, in addition to provide 24-hour veterinary service.

1. Veterinarian Specialist in Neurology

As a Veterinarian Specialist in Neurology, you will play a critical role in diagnosing and treating neurological conditions in our animal patients. Your expertise will allow you to provide advanced medical care, ensuring that each pet receives the personalized treatment they need.

Responsibilities

- Perform thorough neurological examinations and assessments to diagnose disorders.
- Utilize advanced diagnostic techniques, including MRI, CT scans, and neurological evaluations.
- Develop and implement effective treatment plans tailored to individual patient needs.
- Conduct neurology surgeries as required to address specific conditions.
- Collaborate with veterinary technicians, specialists, and pet owners to ensure comprehensive care.
- Stay current with the latest advancements in veterinary neurology and continue professional development.
- Maintain accurate medical records and documentation in compliance with veterinary standards.

Requirements

- Doctor of Veterinary Medicine (DVM) or equivalent degree from an accredited institution
- Registered with HKVSB Specialist in Veterinary Neurology
- Proficiency in diagnostic imaging and laboratory diagnostics.
- Strong analytical and problem-solving skills to assess complex medical cases.
- Excellent communication skills to convey medical information to pet owners clearly and compassionately.
- Ability to work both independently and as part of a collaborative team.

2. Veterinarian Specialist in Internal Medicine

As a Veterinarian Specialist in Internal Medicine, you will play a critical role in diagnosing and treating complex medical conditions in our animal patients. Your expertise will allow you to provide advanced medical care, ensuring that each pet receives the personalized treatment they need.

Responsibilities

- Perform in-depth examinations and assessments to diagnose illnesses and conditions.
- Utilize advanced diagnostic techniques, including ultrasound, endoscopy, and laboratory testing.
- Develop and implement effective treatment plans tailored to individual patient needs.
- Collaborate with veterinary technicians, specialists, and pet owners to ensure comprehensive care.
- Stay up-to-date with the latest advancements in veterinary medicine and continue professional development.
- Maintain accurate medical records and documentation in compliance with veterinary standards.

Requirements

- Doctor of Veterinary Medicine (DVM) or equivalent degree from an accredited institution
- Registered with HKVSB Specialist in Internal Medicine
- Proficiency in diagnostic imaging and laboratory diagnostics.
- Strong analytical and problem-solving skills to assess complex medical cases.
- Excellent communication skills to convey medical information to pet owners clearly and compassionately.
- Ability to work both independently and as part of a collaborative team.

3. Veterinary Registrar in Anaesthesia and Analgesia

As a Veterinary Registrar in Anaesthesia and Analgesia, you will join a friendly and experienced anaesthesia led by a Diplomate of the European College of Veterinary Anaesthesia and Analgesia, and supported by an experienced nursing team consisting of a senior veterinary anaesthesia nurse team and four anaesthesia nurses.

Responsibilities

- Conduct thorough pre-anaesthetic evaluations to assess patient health and anaesthesia risks.
- Employ advanced monitoring techniques, such as pulse oximetry, capnography, and blood pressure monitoring, to ensure patient safety during procedures.
- Develop and implement customized anaesthetic protocols tailored to each patient's needs and medical history.
- Collaborate effectively with veterinary surgeons, technicians, and pet owners to provide comprehensive anaesthetic care.

- Administer anaesthesia and monitor patients throughout surgical procedures, making real-time adjustments as necessary.
- Stay informed about the latest advancements in veterinary anaesthesia and pursue ongoing professional development.
- Maintain accurate and detailed medical records and documentation in compliance with veterinary standards.

Requirements

- Doctor of Veterinary Medicine (DVM) or equivalent degree from an accredited institution
- Registered with HKVSB.
- Completion of an approved rotating internship or internship in Veterinary Anaesthesia
- Post-graduate qualifications in Veterinary Anaesthesia and Analgesia will be advantageous but not essential.
- Strong analytical and problem-solving skills to assess and manage anaesthesia-related workflow challenges.
- Excellent communication skills to convey anaesthetic information for patient handover and occasionally to pet owners.
- Ability to work both independently and collaboratively within a multidisciplinary team.

4. Full- Time Veterinarian (Day & Night Shift)

Responsibilities

- Conduct thorough examinations of animals, diagnose medical conditions, and recommend appropriate treatment plans.
- Respond swiftly and effectively to emergency situations, providing critical care to animals in distress.
- Manage the care of hospitalized animals, ensuring they receive the necessary treatments and monitoring their progress.
- Work closely with other veterinarians, veterinary technicians, and support staff to ensure a cohesive approach to animal care.

Requirements

- Registered with HKVSB.
- Strong analytical and problem-solving skills to assess complex medical cases.
- Excellent communication skills to convey medical information to pet owners clearly and compassionately.
- Ability to work both independently and as part of a collaborative team.

5. Veterinarian Specialist in Cardiology (Locum)

As a Veterinarian Specialist in Cardiology (Locum), you will play a vital role in diagnosing and treating cardiovascular conditions in our animal patients. Your expertise will enable you to deliver advanced medical care, ensuring that each pet receives personalized treatment tailored to their unique heart health needs.

Responsibilities

- Perform thorough cardiac examinations and assessments to diagnose heart disorders.
- Utilize advanced diagnostic techniques, including echocardiography and electrocardiography.
- Develop and implement effective treatment plans tailored to individual patient needs.
- Collaborate with veterinary technicians, specialists, and pet owners to ensure comprehensive care.
- Stay current with the latest advancements in veterinary cardiology and continue professional development.
- Maintain accurate medical records and documentation in compliance with veterinary standards.

Requirements

- Doctor of Veterinary Medicine (DVM) or equivalent degree from an accredited institution
- Registered with HKVSB Specialist in Veterinary Cardiology
- Proficiency in diagnostic imaging and laboratory diagnostics.
- Strong analytical and problem-solving skills to assess complex medical cases.
- Excellent communication skills to convey medical information to pet owners clearly and compassionately.
- Ability to work both independently and as part of a collaborative team.
